PROFESSIONAL SUMMARY

CRM, Business Applications, and IT Operations specialist with 5+ years of experience across production systems, cloud infrastructure, application support, systems integration, and business workflow automation. Built real-time integrations between Property Finder, Bayut, and Bitrix24 CRM, automated lead routing and data synchronization, developed KPI reporting for management, and supported business users through production issues and recurring system problems. Strong hands-on background in REST APIs, PHP, SQL, Azure, AWS, Linux, CI/CD, incident response, root cause analysis, and cross-functional technical support. Completed an independent enterprise integration lab covering Microsoft Dynamics 365 / Power Platform / Dataverse concepts, SAP SD-style sales transaction mapping, simulated EDI/IDOC monitoring, reconciliation, exception handling, and Power BI-ready operational KPIs.

CORE COMPETENCIES

CRM & Business Applications	Bitrix24 CRM (lead routing, pipeline automation, API/webhooks, KPI dashboards), HubSpot, Zoho CRM, Salesforce; Microsoft Dynamics 365 / Power Platform ecosystem concepts
Enterprise Apps Lab	Power Pages / Dataverse concepts, SAP SD-style sales transaction mapping, EDI/IDOC-style monitoring, reconciliation and exception handling - independent simulated lab
Application Support	Production support, L1/L2 troubleshooting, incident resolution, root cause analysis, recurring issue elimination, user support, UAT support, vendor coordination
Systems Integration	REST APIs, third-party integrations, webhooks, data synchronization, PHP/Node.js integration logic, external platform connectivity
Workflow Automation	Lead capture, assignment rules, follow-up logic, pipeline stage automation, cron jobs, shell scripting, operational process automation
Reporting & Analytics	Power BI, Bitrix24 dashboards, Looker Studio, Excel, Google Sheets, KPI reporting; Azure data platform architecture awareness (ADF, ADLS, Databricks)
Cloud & IT Operations	Microsoft Azure, AWS, production environments, VM operations, backups, environment configuration, service reliability
Linux & Web Systems	Ubuntu, CentOS, NGINX, Apache, LAMP, Drupal/PHP application support, DNS, SSL, SSH, LVM
DevOps & Deployment	Git, Jenkins, Azure DevOps, GitHub Actions, Docker, CI/CD pipelines, rollback, configuration automation
Monitoring & Security	Nagios, Prometheus, Grafana, health checks, iptables, SELinux, CSF, SSH hardening, vulnerability patching

WORK EXPERIENCE

Full Stack Developer & DevOps Engineer

Sep 2024 - Present

Inspirefy - Aurantius Real Estate | Dubai Marina, UAE

- ▶ Built a real-time integration layer connecting Property Finder, Bayut, and Bitrix24 CRM, automating end-to-end data synchronization and **eliminating ~90% of manual data entry** across the sales operation.
- ▶ Designed and deployed automated CRM lead-routing and assignment logic in Bitrix24, **reducing average lead processing and response time by ~45%** while removing manual handoff bottlenecks.
- ▶ Developed Bitrix24 KPI dashboards and API-based reporting views for leadership, **providing real-time visibility** into agent performance, response efficiency, conversion rates, and pipeline health.
- ▶ Supported business users and stakeholders by diagnosing recurring CRM, API, application, cloud deployment, and workflow issues, improving application stability and operational continuity.
- ▶ Collaborated with sales and management teams to translate business requirements into CRM workflows, reporting logic, integrations, and technical specifications.
- ▶ Managed user-facing operational systems and supported onboarding activities across business applications, helping users adopt CRM workflows and resolve day-to-day technical issues.
- ▶ Implemented production cloud infrastructure and deployment automation across Azure and AWS, including VMs, environment configuration, backups, security controls, and Git-based CI/CD.
- ▶ Implemented GA4, Google Tag Manager, and Meta Pixel tracking architecture across digital systems to improve event measurement and source attribution.

DevOps Engineer | Linux Administrator | Cloud Specialist

Jan 2021 - Aug 2024

Salsoft Technologies | Pakistan / Dubai / USA (Remote)

- ▶ Led DevOps and production operations for an enterprise hosting environment **spanning 5,000+ live production domains**, maintaining service availability through monitoring, CI/CD automation, backups, and rapid incident response.
- ▶ Resolved production incidents across Linux, web servers, databases, deployments, and hosted applications through structured troubleshooting, escalation, root cause analysis, and corrective actions.
- ▶ Administered CentOS and Ubuntu server environments at scale, managing package installation, kernel updates, dependencies, SSH access, storage, system hardening, and scheduled operations.
- ▶ Deployed and supported LAMP stacks, NGINX, Apache, DNS, SSL, virtual hosts, and multi-tenant hosting configurations in production environments.
- ▶ Automated repetitive operational tasks using Ansible, shell scripting, cron scheduling, and deployment pipelines, reducing human error and manual administration.
- ▶ Implemented Jenkins and Azure DevOps CI/CD pipelines for build, test, and deployment automation with improved release consistency and faster recovery from deployment failures.
- ▶ Configured security controls including iptables, SELinux, CSF, SSH key-based authentication, vulnerability patching, and backup/restore procedures.

WORK EXPERIENCE - CONTINUED

CMS Developer & Web Systems Engineer

Nov 2019 - Aug 2020

Digitonics Labs (Pvt.) Ltd | Karachi, Pakistan

- ▶ Delivered production-ready WordPress and CMS applications across multiple client environments, supporting the full lifecycle from provisioning and technical configuration through QA and live handoff.
- ▶ Worked across varied client application stacks and infrastructure requirements, strengthening practical experience in technical support, deployment, and cross-environment troubleshooting.
- ▶ Supported CMS configuration, web application maintenance, revisions, and operational handover for international agency projects.

SELECTED CRM & SYSTEMS PROJECTS

CRM Integration & Lead Automation Platform

- ▶ Architected a real-time API ecosystem connecting Property Finder, Bayut, and Bitrix24 CRM for automated lead capture and operational data synchronization.
- ▶ Built routing rules by category, region, and priority; automated assignment and pipeline progression; reduced manual data handling and response delays.
- ▶ Created management dashboards and reporting views for response SLA, conversion, agent performance, and pipeline health.
- ▶ Tech Stack: Bitrix24, REST APIs, PHP, Property Finder API, Bayut API, Azure, Power BI, Git.

Enterprise CRM, Field Sales & SAP Integration Lab - Independent Case Study (2026)

- ▶ Built a simulated enterprise integration flow from CRM/customer-service capture through sales transaction mapping and operational reporting, designed around Microsoft Power Platform / Dataverse and SAP SD integration patterns.
- ▶ Implemented SAP SD-style order mapping plus EDI/IDOC-style message statuses, failed-message queue, retry/escalation ownership, reconciliation metrics, and exception monitoring using JSON/CSV test data.
- ▶ Produced Power BI-ready operational KPI output covering transaction volume, posted orders, interface failures, reconciliation gap, and success rate.
- ▶ Lab Stack / Concepts: Dynamics 365 ecosystem, Power Platform, Power Pages, Dataverse, SAP SD, EDI/IDOC, REST/JSON, Python, SQL concepts, Azure integration patterns, Power BI.

Business KPI & Reporting System

- ▶ Developed API-driven KPI dashboards using CRM data aggregation and business rules to give management a consistent operational view across sales activity.
- ▶ Translated changing business definitions into reporting logic, department-level metrics, filters, and management summaries.
- ▶ Tech Stack: Bitrix24 API, Power BI, JavaScript/PHP, Excel/Google Sheets, reporting dashboards.

Cloud Infrastructure & CI/CD Operations

- ▶ Designed and supported production deployment environments on Azure and AWS, including VM configuration, environment separation, SSL, backups, service health checks, and security controls.
- ▶ Built Git-based CI/CD automation with Jenkins and Azure DevOps to standardize deployment and reduce manual release risk.
- ▶ Tech Stack: Azure, AWS, Jenkins, Azure DevOps, Git, Docker, NGINX, Linux, Shell Scripting.

KEY ACHIEVEMENTS

- ▶ **~90% reduction in manual data entry** achieved by building live API synchronization between Property Finder, Bayut, and Bitrix24 CRM.
- ▶ **~45% reduction in lead processing and response time** achieved through automated routing and assignment workflows in Bitrix24.
- ▶ **5,000+ production domains supported** through enterprise-scale Linux, cloud, CI/CD, monitoring, security, and incident-response operations.
- ▶ Built CRM KPI reporting that replaced manual spreadsheet-based operational visibility with **real-time management dashboards**.
- ▶ **Improved production reliability** by resolving recurring infrastructure, deployment, application, and integration issues through root cause analysis and automation.

TOOLS & TECHNOLOGIES

CRM / Business Apps	Bitrix24, HubSpot, Zoho CRM, Salesforce; Dynamics 365 / Power Platform concepts; workflow automation, lead routing, API/webhook integrations
Enterprise Platforms	Power Pages / Dataverse concepts; SAP SD integration concepts; EDI/IDOC-style monitoring and reconciliation (independent simulated lab); Drupal/PHP support
Integration / APIs	REST APIs, webhooks, PHP, Node.js, JSON/XML patterns, third-party data synchronization, exception handling
IT Operations	Application support, incident management, RCA, production troubleshooting, service reliability, L1/L2 support, UAT support, vendor coordination
Cloud	Microsoft Azure, AWS EC2/ELB/S3/CodePipeline, VM operations, backup and environment configuration
Linux / Servers	Ubuntu, CentOS, NGINX, Apache, LAMP, DNS, SSL, SSH, LVM, cron, WHM/cPanel
DevOps	Jenkins, Azure DevOps, GitHub Actions, Git, Docker, Ansible, Puppet, Chef
Data / Reporting	SQL, MySQL, MongoDB, Power BI, Excel, Google Sheets, Bitrix24 dashboards; ADF/ADLS/Databricks architecture awareness
Monitoring / Security	Nagios, Prometheus, Grafana, iptables, SELinux, CSF, SSH hardening, vulnerability patching

EDUCATION

Bachelor of Computer Science | 2023

Ilma University, Karachi, Pakistan | GPA: 3.0+ | 4-Year Honours

CERTIFICATIONS

- ▶ Microsoft Azure: Cloud Concepts (Microsoft Certified)
- ▶ Microsoft Azure: Architecture & Services (Microsoft Certified)
- ▶ Microsoft Azure: Management & Governance (Microsoft Certified)
- ▶ Azure DevOps (Microsoft Certified)
