

# MUHAMMAD MOEEZ KHAN

Full Stack Developer | Backend & API Engineering | AI Automation | Cloud & DevOps

Dubai, UAE | [+971 521172452](tel:+971521172452) | [moezkhan392@gmail.com](mailto:moezkhan392@gmail.com) | [linkedin.com/in/muhammad-moezkhan112/](https://www.linkedin.com/in/muhammad-moezkhan112/)

Visa Status: UAE Residence Visa Holder | Available to Join Immediately

Portfolio: [moezkhan112.github.io](https://moezkhan112.github.io) | GitHub: [github.com/Moezkhan112/](https://github.com/Moezkhan112/)

## PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of experience building production web applications, API integrations, CRM platforms, automation workflows, and cloud hosted systems. Strong hands on experience with PHP, JavaScript, TypeScript, React, Next.js, Node.js, WordPress, REST APIs, Bitrix24, n8n, Azure, AWS, Docker, Kubernetes, and Linux. Delivered UAE real estate platforms, business intelligence dashboards, production backend systems, AI assisted workflows, and large scale hosting infrastructure. Experienced across application architecture, backend development, frontend implementation, deployment, performance optimization, and production support. UAE Residence Visa Holder and available to join immediately in Dubai.

## CORE COMPETENCIES

|                                   |                                                                                                                                        |
|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Full Stack Development            | End-to-end web application development across frontend, backend, data, integrations, deployment, and production support                |
| Backend & API Engineering         | RESTful API design, backend business logic, authentication and authorization, webhooks, background processing, and service integration |
| System Architecture               | Scalable application design, service separation, caching, data aggregation, reliability controls, and production-oriented architecture |
| CRM & Workflow Automation         | Lead routing, pipeline automation, CRM synchronization, business-process logic, assignment workflows, and operational automation       |
| AI & Intelligent Automation       | AI agents, workflow orchestration, LLM integrations, tool calling, text and voice automation, and data-assisted workflows              |
| Cloud & DevOps Engineering        | Cloud deployment, containerization, CI/CD, Linux administration, production operations, scaling, and release management                |
| Systems & Platform Integration    | Property portals, CRM systems, external APIs, webhooks, third-party services, and cross-platform data synchronization                  |
| Performance Engineering           | Application and server optimization, Core Web Vitals, caching strategy, database performance, and production troubleshooting           |
| Analytics & Business Intelligence | KPI dashboards, operational reporting, event measurement, CRM analytics, data aggregation, and management reporting                    |

## WORK EXPERIENCE

### Full Stack Developer

Sep 2024 to Present

**Inspirefy** | Aurantius Real Estate | Dubai Marina, UAE

- ▶ Architected and built a real time integration connecting Property Finder and Bayut with Bitrix24 CRM and the platform backend, enabling live listing synchronization and automated data flow that eliminated approximately 90% of manual data entry.
- ▶ Developed and maintained a Next.js KPI and business intelligence application integrated with Bitrix24, providing department, manager, and agent reporting across leads, deals, listings, conversions, and operational performance.
- ▶ Built backend data aggregation, attribution, and role based access logic across Bitrix24 Leads, Deals, and Dynamic Smart Processes, including lead ownership, assignment history, shared pool handling, listing attribution, rental renewal logic, and monthly KPI calculations.
- ▶ Implemented production API reliability controls including cursor based pagination, request throttling, retry and backoff handling, caching, and stabilization logic for rate limited CRM datasets.
- ▶ Engineered a full stack lead management system with custom Bitrix24 routing by category, region, and priority, reducing average agent response time by approximately 45% and improving pipeline throughput.
- ▶ Developed UAE real estate web platforms using PHP, JavaScript, WordPress custom modules, REST APIs, responsive interfaces, dynamic property dashboards, and CRM connected forms.

- Implemented frontend measurement using GA4, Google Tag Manager, and Meta Pixel, including custom data layer scripts, event triggers, and conversion tracking across platform touchpoints.
- Delivered Core Web Vitals and application performance improvements, increasing PageSpeed Insights scores by approximately 35 points through image optimization, lazy loading, render blocking resource reduction, caching, and server tuning.
- Managed production deployments and cloud infrastructure across Azure and AWS, including virtual machines, load balancers, environment configuration, process management, Git based releases, and production troubleshooting.
- Translated sales, operations, management, and marketing workflows into technical specifications, data models, automations, dashboards, and user facing functionality.

#### **DevOps and CMS Developer | Web Optimization Lead**

*Jan 2021 to Aug 2024*

**Salsoft Technologies** | Pakistan / Dubai / USA (Remote)

- Supervised a development team delivering WordPress and CMS solutions across 20+ concurrent client projects, overseeing code quality, architecture decisions, technical troubleshooting, QA, and on time delivery across international accounts.
- Managed DevOps infrastructure for 5,000+ live production domains, maintaining high availability through CI/CD pipelines, automated backups, proactive server monitoring, and production incident resolution.
- Administered Linux hosting environments including Ubuntu and CentOS, configuring Apache and NGINX web servers, virtual hosts, DNS, SSL, SSH access, WHM/cPanel, and application hosting services.
- Implemented and maintained CI/CD pipelines using Jenkins and Azure DevOps, automating build, test, and deployment workflows to reduce release time and manual deployment errors.
- Diagnosed complex application and hosting bottlenecks, achieving 20 to 40% PageSpeed improvements through frontend optimization, caching strategy, database tuning, and server side configuration.
- Executed site recovery and security remediation on compromised WordPress installations, including malware removal, vulnerability patching, access hardening, SSL and DNS correction, and preventive server configuration.

#### **Web Developer | WordPress and CMS**

*Nov 2019 to Aug 2020*

**Digitonics Labs (Pvt.) Ltd** | Karachi, Pakistan

- Built production ready WordPress and CMS solutions in an agency environment, managing the lifecycle from technical scoping and development through QA, revisions, optimization, and client handoff.
- Delivered responsive development, CMS customization, debugging, performance optimization, and business driven technical solutions across diverse client industries and project types.

## **PROJECTS AND PORTFOLIO**

---

### **Aurantius Bitrix24 KPI & Business Intelligence Platform** [ [Next.js](#) | [Bitrix24 REST API](#) | [CRM Analytics](#) | [RBAC](#) | [Caching](#) ]

- Built an API driven KPI platform that consolidates Bitrix24 Leads, Deals, and Dynamic Smart Process data into department, manager, and agent dashboards for sales, leasing, listings, conversion, and operational reporting.
- Implemented role based routing and access for managers, administrators, and individual agents, with business specific attribution for lead ownership, assignment history, shared pools, listings, and closed deals.
- Engineered stable CRM data retrieval using pagination, request throttling, retries, caching, and historical KPI handling for production reporting.

### **Production REST API Architecture** [ [Node.js](#) | [Express.js](#) | [TypeScript](#) | [PostgreSQL](#) | [Prisma](#) | [Redis](#) | [BullMQ](#) | [OpenTelemetry](#) | [Docker](#) ]

- Designed a production oriented backend architecture with separated routes, services, middleware, configuration, background queues, caching, centralized error handling, and containerized deployment patterns.
- Implemented PostgreSQL access through Prisma, Redis backed caching and job processing, BullMQ workers, and OpenTelemetry observability patterns for scalable application workloads.

### **Property Finder + Bayut + CRM Automation Platform** [ [Property Finder API](#) | [Bayut API](#) | [Bitrix24](#) | [Zoho CRM](#) | [HubSpot](#) | [Salesforce](#) | [REST APIs](#) ]

- Built a real estate automation workflow connecting Property Finder, Bayut, backend systems, and CRM platforms to synchronize property data, automate CRM ingestion, and reduce manual operational work.

- Implemented lead routing and integration logic across Bitrix24, Zoho CRM, HubSpot, and Salesforce, achieving approximately 90% lower manual data entry overhead and approximately 45% faster lead response / processing in the documented project.

**Scalable Real Estate Platform Infrastructure** [\[ Kubernetes | Docker | Redis | Load Balancing | Ingress | Monitoring | System Design \]](#)

- Redesigned a real estate platform beyond a single instance setup using Kubernetes horizontal scaling, load balancing and ingress, Redis caching, and failure aware infrastructure patterns.
- Designed for pod failures, traffic spikes, cache misses, and external API slowdowns, with monitoring signals covering CPU, memory, request rate, error rate, p95 latency, cache hit ratio, and infrastructure health.

**AI Powered Real Estate Assistant and Workflow Automation** [\[ n8n | OpenAI | Telegram API | AI Agents | Speech to Text | Tool Calling | Large Dataset Retrieval \]](#)

- Built an AI driven real estate workflow using n8n, OpenAI, and Telegram, supporting text and voice requests, speech to text transcription, AI intent understanding, property requirement matching, and property recommendations.
- Connected the assistant to large property and DLD / owner datasets for fast record lookup, seller and owner retrieval, permitted contact information retrieval, and tool based actions through the AI agent.

**KEY ACHIEVEMENTS**

- **~45% reduction in lead response time:** Automated lead routing and distribution logic in Bitrix24 for a Dubai real estate operation.
- **~90% elimination of manual data entry:** Live synchronization between Property Finder, Bayut, and the Bitrix24 CRM backend.
- **5,000+ production domains managed:** Enterprise scale hosting infrastructure supported with automated deployments, backups, monitoring, and server administration.
- **20 to 40% PageSpeed improvements:** Performance gains delivered across client web applications through frontend optimization, caching, database tuning, and server side configuration.
- **20+ concurrent client projects:** Web and CMS delivery supervised across international agency accounts while maintaining code quality and delivery standards.

**TOOLS AND TECHNOLOGIES**

|                         |                                                                                                                 |
|-------------------------|-----------------------------------------------------------------------------------------------------------------|
| Languages               | PHP, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Shell / Bash                                              |
| Frontend                | React.js, Next.js, HTML5 Canvas, Framer Motion                                                                  |
| Backend & APIs          | Node.js, Express.js, REST APIs, Webhooks, WebSockets                                                            |
| Databases & Data        | MySQL, MongoDB, PostgreSQL, Prisma ORM, Redis                                                                   |
| AI & Automation Tools   | n8n, OpenAI API, ChatGPT, Codex, Claude, Claude Code, Google Gemini, Google Antigravity, GitHub Copilot, Cursor |
| CRM Platforms           | Bitrix24, HubSpot, Zoho CRM, Salesforce                                                                         |
| Cloud & Containers      | Microsoft Azure, AWS (EC2, ELB, CodePipeline), Docker, Kubernetes, OpenShift, PM2                               |
| Infrastructure          | Linux (Ubuntu, CentOS), NGINX, Apache, DNS, SSL, SSH, WHM/cPanel                                                |
| CI/CD & Version Control | Jenkins, Azure DevOps, Git, GitHub, SVN                                                                         |
| CMS & Ecommerce         | WordPress, Shopify, Webflow, Magento, Wix, WooCommerce                                                          |
| Analytics               | GA4, Google Tag Manager, Meta Pixel, Hotjar, SEMrush                                                            |
| Reporting               | Google Looker Studio, Power BI, Bitrix24 Dashboards, Excel (Advanced), Google Sheets                            |

## EDUCATION

---

**Bachelor of Computer Science**

2023

Ilma University, Karachi, Pakistan | GPA: 3.0+ | 4-Year Honours

**Credentials:** Degree Attested by MOFA | UAE Equivalency Certificate | Police Clearance Certificate

## CERTIFICATIONS

---

- ▶ Microsoft Azure: Cloud Concepts (Microsoft Certified)
- ▶ Microsoft Azure: Architecture and Services (Microsoft Certified)
- ▶ Microsoft Azure: Management and Governance (Microsoft Certified)
- ▶ Azure DevOps (Microsoft Certified)

## LANGUAGES AND AVAILABILITY

---

English (Professional) | Urdu (Native)

**Visa Status:** UAE Residence Visa Holder | Available to Join Immediately | Based in Dubai
